Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Pokorzynski et al. (US2002/0125734).

Pokorzynski et al. disclose a vehicle having a body (18). In reference to claims 1, 2, 4-7, 9-12, 14, and 15, the inner panel (35) is molded in a two shot process with flexible outer panel (25). The flexible outer panel (25) covers a portion of the outer surface of the inner panel (35) and extends beyond the perimeter of the inner panel (35). The flexible outer panel is made of one of many materials including urethane, a known thermoplastic elastomer. The flexible outer panel reduces a gap between the inner panel (35) and the body (18). In reference to claims 1-3, 6-8, 11, and 13, the inner panel (25) is attached to a flexible outer panel (18) by molding the two pieces together. While the outer panel (18) is disclosed to be rigid, the panel is inherently capable of flexing due to its size, shape and material. Without a basis for comparison to determine what it is meant by “flexible”, the outer panel of Pokorzynski et al. will read on this limitation as broadly claimed. The outer panel (18) reduces the gap between the inner panel (25) and the vehicle body (12). The inner panel is molded of TPO.
